

Rock Bucket

Rock / Rack bucket is used for fast clean-up, ground levelling, sifting out debris & rocks, and gathering material away from buildings and obstructions

Operators now wishing to minimise waste on site will find that the use of this type of bucket means that material can be sifted and sorted to clear out unwanted material and leave good soil or material behind.

Features:

- 1650 (66"), 1900mm (75") bucket widths available
- 76mm (3") Tine spacing
- Rock bucket designed to offer maximum production and cover wheel bases of skid-steer loaders and tractors
- Available with or without single piece construction universal skid-steer mounting
- Optional bolt-on universal skid-steer and tractor loader mounts available - must specify frame type when ordering
- 1045 Steer bar, high grade steel

Ideal Use:

Clearing Construction Sites, Sifting Debris and much more

Machine Suitability:

Skid steer loaders and Tractors

Mini Rock Bucket
also available
